

ACTIVITY-BASED DESIGN FOR MODERN MINDS

THE GLOBE CONCEPT

Design: Peter Opsvik

A UNIQUE COMBINATION OF DESIGN AND ERGONOMICS - FOR THE MODERN OFFICE.

You have never seen or experienced anything like it. The world's first all-inclusive laptop workplace is born, together with a family of ergonomic, stunning office chairs.

Developed by one of Scandinavia's most famous designers – Peter Opsvik (Tripp Trapp, Capisco and Varier Balans) - the Globe Concept is created for the modern, mobile and active workplace.

"Conventional workplaces will be challenged by compact units that better suits our new, more flexible and IT-driven way of working."

Peter Opsvik

GLOBE ONE

GLOBE TWO

GLOBE ONE

An ergonomic stool, perfect in waiting room areas or in areas where freedom of movement of the upper body is essential. Globe One encourages an active and upright sitting position, just like a rider on horseback.

GLOBE TWO

The increased seating height and the rounded backrest, provide maximum support for the back and shoulders. Without time-consuming chair settings, Globe Two and an adjustable desk – forms a perfect combination of a modern workplace.

GLOBE "TREE"

GLOBE GARDEN

GLOBE "TREE"

The "all inclusive" option. With dual backrests, rounded seat, footboard and footrest together with the two flexible tabletops, it offers a complete and super-ergonomic workstation in a compact format. Globe "Tree" is the new laptop workplace which addresses the changes that information technology has influenced the way we work today.

GLOBE GARDEN

The original Garden chair, designed by Peter Opsvik 30 years ago, is now re-launched in a new version. In the updated version the branches of the tree continues down and become supporting footrests. Garden is an icon, an art object and eye catcher. But it also offers numerous comfortable sitting positions.

”CompActive” SEATING

The Globe Concept is based on two simple principles – active sitting and compact thinking. The freedom to tweak around and the availability of body mobility, determines whether we are seated comfortably and able to work concentrated.

CUSTOM MADE FOR LAPTOP USERS.

Globe "TREE" has everything you need, incorporated in a smart eye-catching unit. It allows you to work comfortably in a minimum space (1x1 m). As soon as you leave, it is ready to welcome next user.

A PERFECT MATCH

With its single rotating backrest, Globe Two provides more variation of sitting postures. Both active forward and more relaxed sideways and reclined. Globe Two, together with an adjustable desk, is the perfect match for a modern workplace.

KING-SIZE ONLY

The original Garden chair, designed by Peter Opsvik 30 years ago, is now relaunched in a new, improved version. Garden is an icon, an art object and eye catcher. But it also offers numerous comfortable sitting positions.

Globe Garden is a masterpiece. With its spectacular design it is a statement in any public space as well as a sound haven for creative thinking.

"Our ancestors lived in trees! When I designed Garden in 1985 I wanted to show how the norms of 'sitting nicely' and 'sitting correctly' can be broken."

Peter Opsvik
