Interior design

Interior design

“It is by studying the forms of nature that we will discover the basic principles which guide the creation of shape, space and composition and be able to build a living architecture that not only provides us with physical comfort but with spiritual enjoyment as well.”

Albert Frey 1939

Every Strato project, from customized kitchens to furniture for dining rooms and bathrooms, is unique and meets the requirements of contemporary living according to the client's specific needs. Our designers and workers follow all the planning phases from costs analysis, cad design, renders, construction, transport and installation all over the world.

Form is the result of our work.

If we don't want our society to destroy itself through carelessness, we need to apply concepts of sustainability and ecological responsibility at all levels of life.
